Total Security Solutions

GSA Providing Security and Law Enforcement Solutions to the Federal and Military Community

New challenges face today's Federal community. In the past security was set up to protect employees from theft. The threat has now changed to domestic and international terrorism as well as work place violence. With these new threats, the law enforcement community and facility management fields are having to reassess the way the public is protected from these new threats.

While always a top priority for the Military community, recent cases such as:

"At 9:02 am Wednesday morning, April 19, 1995 an explosion devastated the Alfred P. Murrah Federal Building, in downtown Oklahoma City"

— KWTV

"The bomb blasts at U.S. Embassy compounds in Nairobi, Kenya, and Dar es Salaam, Tanzania, demonstrate the continued vulnerability of U.S. interests around the world..."
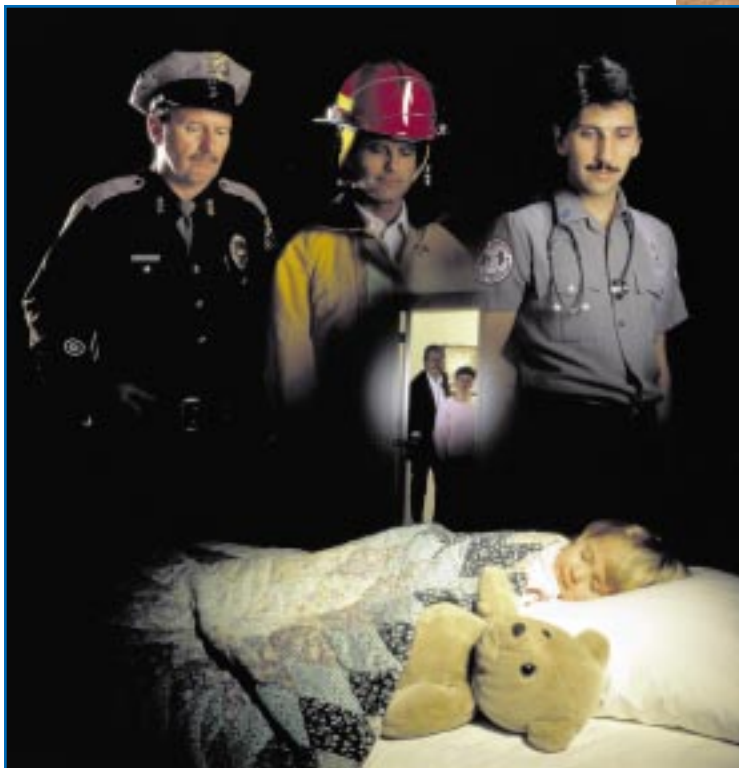

— CNN

"...day trader fatally shot nine people and injured 13 others at two brokerage firms in Atlanta in one of the worst office massacres in U.S. history"

— Star Telegram

have turned security issues into a top concern in the Federal community. These stories have made building security one of the primary challenges facing facility managers and law enforcement organizations nationwide.

After the bombing of the Alfred P. Murrah Federal Building, the Department of Justice launched a review of the vulnerability of federal buildings to terrorist attacks and other forms of violence. The United States Marshals Service (USMS) coordinated a vulnerability assessment study with participating agencies including the Federal Bureau of Investigation (FBI), U.S. Secret Service, General Services Administration (GSA), State Department, Social Security Administration, and Department of Defense. The purpose of this study was to assess vulnerability of federal buildings and develop minimum security standards. A security matrix has been provided on page 4 to identify your facility's recommended standard.

Once you determine your facility's necessary upgrades, use this publication as a product guide to purchase any upgrades.

You may order a copy of the Department of Justice's report titled, *"Vulnerability Assessment of Federal Facilities,"* by contacting the Government Printing Office (GPO) by phone, fax or mail at:

Phone: (202) 512-1800 between 8:00 am and 4:00 pm E.S.T., Fax: (202) 512-2250

Superintendent of Documents P.O. Box 371954 Pittsburgh, PA 15250-7954 Publication is numbered 027-000-01362-7 Price: $7.00

SECURITY MATRIX

Typical Location	Example of Tenant Agencies	Security Measures (Based on Evaluation)

LEVEL 1

| ≤ 10 Federal Employees
≤ 2500 Square Feet
Low Volume Public Contact
Small "Store Front" Type Operation | Military Recruiting
Small Post Office
USDA Office
Border Patrol Station (remote)
Custom/INS Checkpoint (remote)
Social Security Administration | -High Security Locks
-Intercom
-Peep Hole (Wide View)
-Lighting w/Emergency Backup Power
-Controlled Access to Utility Area
-Annual Employee Security Training |

LEVEL 2

| 11 – 150 Federal Employees
2500 – 80,000 Square Feet
Moderate Volume Public Contact
Routine Operations Similar to
Private Sector and/or Facility Shared
  w/Private Sector | Public Officials (Congress/Senate)
Railroad Retirement Board
INS Offices
U.S. Customs Offices | -Entry Control Package w/CCTV
-Visitor Control/Screening
-Shipping/Receiving Procedures
-Guard Patrol Assessment
-Intrusion Detection w/Central Monitoring
-CCTV Surveillance (Pan-Tilt, Zoom System)
-Duress Alarm w/Central Monitoring |

LEVEL 3

| 151 – 450 Federal Employees
Multi-Story Facility
80,000 – 150,000 Square Feet
Moderate/High Volume Public Contact
Agency Mix:
  Law Enforcement Operations
  Court Functions
  Government Records | U.S. Bankruptcy Court
Inspectors General
IRS Criminal Investigations Division
U.S. Probation
U.S. Pretrial Services
Federal Public Defender
GSA Field Office | -Guard Patrol on Site
-Security Screening (X-ray & Magnetometer)
-Mylar Window Film (Shatter Protection)
-Agency Photo ID
-Parking Control ID System
-Parking Area Lighting w/Power Backup
-Centralized Delivery Procedure
-X-ray Mail and Packages
-Street Set-Back (New Construction) |

LEVEL 4

| > 450 Federal Employees
Multi-Story Facility
> 150,000 Square Feet
High Volume Public Contact
High Risk Law Enforcement
    Intelligence Agencies
District Court | U.S. District Courts
U.S. Marshals Service
FBI
DEA
ATF
U.S. Secret Service | -Extend Perimeter (Concrete/Steel Barriers)

-24HR Guard Patrol

-Adjacent Parking Control (New Construction)
-Backup Power System
-Hardened Parking Barriers |

LEVEL 5

| Level IV Profile and Agency/Mission
  Critical to National Security | U.S. Department of State HQ
CIA Headquarters, Pentagon | -Agency Specific |

What You Will Find

This publication encompasses two sections which include security systems, integrated facility management systems and law enforcement protection equipment. The scope of the Security Solutions Section comprises product categories from four Federal Supply Schedules including Schedule 63 I Alarm and Signal Systems, 61 V Power Distribution Equipment, 56 IV A Construction and Building Materials, and 84 VI A Law Enforcement & Security Equipment. The scope of the next section focuses on law enforcement equipment and supplies from Schedule 84 VI A Law Enforcement & Security Equipment. To download a copy of those schedules go to *www.gsa.gov/regions/7fss/7fx/publications/* and click into the Federal Supply Schedules option. As a total solution the GSA General Products Center not only offers product, but several services including installation, maintenance, training and consulting. Two new services include tactical law enforcement training and guard services.

How to Use this Publication

We understand that because of the complexity of security systems, this publication can only be used as a guide in the first stage of your selection process. GSA contractors will guide you through the remainder of this process with the personal assistance you need. Begin by finding the type of system that interests you. Once you find the type of product or system required, there will be a list of brands and the contractors that provide those brands. In accordance with simplified ordering procedures, contact the contractor(s) for consultation.

> **Contract Award Information**
> **www.gsa.gov/regions/7fss/7fx**

For a listing of the very latest contract award information, you may click into the Security and Law Enforcement Solutions section of the web site to get a contractor contact list.

You may also search Schedules-E-Library for the latest contractor information. Simply go to *pub.fss.gsa.gov/sched* and click in the Schedules-E-Library icon. You can search E-Library by Contractor, Schedule Number or by Keyword.

If you do not have access to the Internet, you can get a list of the current contractors by completing the form on page 30 of this publication and either mail or fax to (817) 978-3761. **For further assistance contact Customer Relations at 817-978-4545.**

Simplified Ordering Procedures

Orders under the micropurchase threshold:

• Place order directly with contractor for the item that best meets your needs.

Orders over the micropurchase threshold:

To ensure a "Best Value" determination is made, as required by FAR 8.404:

• Review the GSA Advantage!™ on-line electronic ordering system @ pub.fss.gsa.gov

— **or** —

• Review 3 schedule pricelists.

• Consider price, plus administrative costs.

• Place order directly with contractor.

When determining what is a "best value," you may consider the following:

• Special features of the supply/service are required but not provided by a comparable supply/service

• Trade-in considerations

• Probable life of the item selected compared to that of a comparable item

• Warranty considerations

• Maintenance availability

• Past performance

• Environmental and energy efficiency considerations

• Place order directly with contractor

Perimeter Security

In the past, access to federal buildings for government services were meant to be easy and convenient. Now as the social environment has changed from prevention from theft to the protection of federal employees from both domestic and international terrorism, new security measures are important. Protection begins before one reaches the entrance of a facility. This means that for those facilities that are considered level III, IV, and V (refer to matrix), security begins at the perimeter.

Perimeter Detection Systems

These systems detect access to the outer limits of a detection area by means of physical barriers, sensors on physical barriers, or exterior sensors.

Fence Systems — A sensor placed on a fence to detect intrusion by means of cutting, climbing, or jacking of the fence fabric.

Brand	Contractor
ADT	ADT Security Services Inc
Fiber Defender	Fiber SenSys Inc

Ground Based Systems — A buried seismic type sensor consisting of a coaxial cable with piezoelectric ceramic disks located between the center conductor and the shield at equal intervals. Pressure from seismic motion on the disk causes them to generate a signal.

Brand	Contractor
ADT	ADT Security Services Inc
Fiber Defender	Fiber SenSys Inc
Senstar	Vikonics Inc

Microwave Systems — A system employing radio frequency motion detectors operating in the microwave frequency range of the electromagnetic spectrum.

Brand	Contractor
ADT	ADT Security Services Inc
Southwest Microwave	Vikonics Inc

Beams — A device which detects a physical or invisible beam of light and responds to its complete or nearly complete interruption.

Brand	Contractor
ADEMCO Sensory Company	ADEMCO
ADT	ADT Security Services Inc

Emergency Communications/Intercom

Brand	Contractor
Talk-A-Phone	ISS Inc

Key Control Management

Brand	Contractor
Instakey	Instakey Lock Corporation

Interior Security

Minimum security standards recommend that all facilities have some type of interior security system. This would begin with controlling access around and inside federal and military facilities. Refer to Matrix for recommended Minimum Security Standards on page 4.

Access Control

Access control systems do just that, they control persons, vehicles and material through entrances and exits of a controlled area or premise. Whether your security needs require a stand alone unit or access control as part of a total integrated package, GSA has your security solution.

Stand Alone — A self-contained free-standing device for a particular door.

Brand	Contractor
ACS 61, ACS 51	SMF Systems Corp
ADT	ADT Security Services Inc
American Magnetics (AMAG)	Systems Engineering Inc
Cardkey	Cardkey Government Systems

Tag in a Bag, Prox in a Box	Visonic Inc
Westinghouse Security Electronics	Advanced Testing Technologies

Parking — Access control devices for parking areas

Brand	Contractor
ACS 51	SMF Systems Corp
Cardkey	Cardkey Government Systems
Casi-Rusco	Casi-Rusco Inc
Delta Scientific	Delta Scientific Corp
Gate Access	Control Systems International
ITI	Interactive Technologies Inc
N-300, N-1000 Pro Watch 2000	ADEMCO/Northern Computer Inc
Safenet/2, Safenet/NT, Act-2, Point Guard, Act-4	Ultrak Inc
Software House, Andover	ISS Inc
Westinghouse Security Electronics	Advanced Testing Technologies Inc

Vehicle Arrest — Consist of parking control gates, security booths, barriers, barricades, and bollard systems.

Brand	Contractor
Axcess Inc	ISS Inc
Delta Scientific	Delta Scientific Corp
Westinghouse Security Electronics	Advanced Testing Technologies Inc

High Security Padlocks —

Used on perimeter gates, these general field service padlocks are intended to replace many of the high-cost medium security padlocks currently used. They are available with shackle diameters of 3/8" and 1/2", and has Heel & Toe deadlocking.

Brand	Contractor
Abloy	Abloy Security Inc

Intrusion Detection

While access control systems determine who enters an area, intrusion detection systems detect entry or attempted entry of a person or an object into an area.

Sensors — Three types of sensors — PIR (passive infrared), microwave, photoelectric — include heat sensors which detect intrusion into a protected area.

Fire Alarm Monitoring Systems

Brand	Contractor
Digitize	Systems Engineering Inc

Facility Management

These systems are set up to monitor a variety of devices that control several aspects to the overall maintenance of a facility. This may include security functions, fire alarm functions, energy management functions, building automation systems such as lighting, heating, and air conditioning.

Surveillance — Control of premises for security purposes through alarm systems, CCTV and other monitoring devices.

Brand	Contractor
Adler	Adler Video System
ADT	ADT Security Services Inc
Cardkey	Cardkey Government Systems
CSI	Control Systems International
GBC, CCTV & Valatel	Sentrol Inc
Javelin Systems - CCTV	ADEMCO
Sensormatic, Lorovix, Videolarm, Silent Witness	ISS Inc
Sentry Tech.	Sentry Tech
Ultrak K Series Cameras, Diamond Domes Max-pro 1000 System, Safenet/2, Safenet/NT	Ultrak Inc
Vicon, Javelin, Burle AD	Vikonics Inc

HVAC — A system that monitors and controls heat, ventilating and air conditioning for a facility.

Brand	Contractor
Alerton/Bactalk	Alerton Technologies Inc
CSI	Control Systems International
ESL	Sentrol Inc
Intelligent Automation, Network 8000, Digital Management Systems	Siebe Environmental Controls
Johnson Controls	Johnson Controls Inc

Energy Management — A combination of monitoring and control devices to provide a maximum efficiency of energy consumption.

Brand	Contractor
Alerton/Bactalk	Alerton Technologies Inc
CSI	Control Systems International
ESL	Sentrol Inc
Intelligent Automation, Network 8000, Digital Management Systems	Siebe Environmental Controls
Johnson Controls	Johnson Controls Inc
Ultrak K Series Cameras, Diamond Domes Max-pro 1000 System, Safenet/2, Safenet/NT	Ultrak Inc

X-Ray Security Screening — Metal and bomb detection to include magnetometers, hand-helds, x-ray, electronic and chemical analysis, mail letters and packages; trace detectors.

Brand	Contractor

GSA Total Security Solutions.

Not just the product… Our contractors are here to provide you with a variety of services tailored to meet your needs.

- **Installation**
- **Maintenance**
- **Training**
- **Consulting**
- **Leasing**

Training does not stop with the product. Several tactical law enforcement courses are available:

- Evasive and Defensive Driver Training
- Terrorist Surveillance Detection Training
- Protective Services Training
- Progressive Firearms Training
- Personal Security Awareness Training
- Personal Defensive Measures Training
- Vulnerability Surveys
- Mobile Assistance and Training

Finally for those agencies that do not have onsite security, GSA now has guard services.

For more information on these services, choose from the variety of contractors listed on page 19.

For updated information pertaining to services, visit our web site at
www.gsa.gov/regions/7fss/7fx.
